Professional Summary

Software Developer with 2 years of experience building and maintaining web applications, system integration, and AI-driven solutions. Experienced in developing scalable backend services, integrating APIs and collaborating with cross-functional teams to deliver reliable software solutions. Proficient in problem-solving, debugging, and contributing across the full software development lifecycle. Familiar with modern development tools, version control systems, and hands-on exposure to AI-driven applications.

Skills

Javascript, C#/.NET, Git/Version Control, AI, REST APIs, Agile Methodology, Databases(SQL, MongoDB)

Experience

JUNE 2024 - PRESENT

Griffin Global Technologies - *Software Engineer*

- Collaborated in developing a time entry system that streamlined employee work-hour tracking, improved operational efficiency, and enhanced reporting accuracy.
- Contributed to building automated data synchronization processes across multiple applications, reducing manual errors and improving data consistency and reliability.
- Developed an AI-powered support platform embedded within company systems to help users access accurate information and receive answers from the company knowledge base efficiently.

Education

MAY 2019 - APRIL 2024

Dedan Kimathi University of Technology - *Bachelor of science in Actuarial Science and Statistics*

Graduated with Second class honors upper division. Developed a strong foundation through advanced coursework in probability, statistics, mathematical modeling, and risk analysis. Applied programming in R for data analysis and financial modeling, building strong computational thinking and problem-solving skills transferable to software engineering

JANUARY 2024 - MARCH 2024

Teach2Give – *Software Development Training*

Completed an intensive software development training program focused on full-stack development, backend APIs, databases, cloud deployment, and modern software engineering practices using technologies such as React, JavaScript, SQL, and Git.
