EDUCATION

Bachelor of Science in Actuarial Science
Dedan Kimathi University of Technology | 2024

SKILLS

- Full-Stack Development
- Enterprise Applications
- Business Automation
- Cloud Solutions
- API Development
- REST APIs
- Backend Development
- Frontend Development
- Web Development
- Application Architecture
- AI Applications
- AI Integration
- RAG Development
- Cloud Engineering
- Database Development
- Database Management
- Third-Party Integrations
- System Integration
- Application Testing
- Software Deployment
- Performance Optimisation
- User Interfaces
- Business Applications
- Data Synchronisation
- Serverless Computing
- Transport Systems
- Time Management
- Knowledge Retrieval
- Application Development
- Software Engineering

LANGUAGES

- English – Proficient
- Swahili – Native

EXECUTIVE PROFILE

Full-Stack Software Engineer with 2+ years of experience developing enterprise applications, cloud solutions and business automation platforms across .NET and JavaScript ecosystems. Specialises in scalable APIs, modern web interfaces, third-party integrations and AI-powered applications, with experience spanning architecture, development, testing and deployment. Built solutions including employee transport booking, time-entry management, data synchronisation and AI knowledge platforms using technologies such as C#, .NET, Node.js, React, Next.js, SQL Server and Azure. Seeking to apply expertise in full-stack development and cloud engineering to a Full-Stack Software Engineer role requiring proven capability in enterprise application development and intelligent business automation.

WORK EXPERIENCE

Software Developer
Griffin Global Technologies | Nyeri, Kenya | Mar 2026 – Present
Key Responsibilities:

- Designed and developed enterprise software solutions for transport management and business automation, translating operational requirements into scalable application features.
- Built backend services and APIs in .NET and developed modern web interfaces to support core business workflows and administrative processes.
- Developed AI assistant features using OpenAI and Azure services to improve access to organisational knowledge and support information-driven workflows.
- Integrated cloud services and external systems into business applications, extending functionality and enabling connected operational processes.
- Managed software features across architecture, implementation, testing, debugging and deployment, taking ownership from initial design through release.
- Enhanced application functionality by identifying workflow requirements, implementing technical solutions and refining features based on operational needs.
- Supported distributed software delivery through coordinated development, testing and deployment activities across enterprise application projects.

Associate Software Developer
Griffin Global Technologies | Nyeri, Kenya | Oct 2024 – Mar 2026
Key Responsibilities:

- Developed and maintained REST APIs using .NET to support functionality across multiple enterprise software products and business workflows.
- Built and enhanced web application interfaces using React, Next.js, TypeScript and JavaScript to deliver functional user experiences.
- Implemented third-party integrations that extended application capabilities and enabled communication between internal platforms and external services.
- Worked with SQL Server, PostgreSQL and MongoDB to support application data storage, retrieval and backend development requirements.
- Optimised application performance by investigating system behaviour, refining implementation and addressing issues affecting reliability and responsiveness.

- Participated in code reviews, testing, debugging and deployment activities to maintain application quality throughout the software delivery lifecycle.
- Supported distributed development workflows across multiple products, coordinating implementation and release activities to deliver application enhancements.

Software Developer Intern
Griffin Global Technologies | Nyeri, Kenya | Jun 2024 – Oct 2024
Key Responsibilities:

- Contributed to application development across coding, testing, debugging and deployment activities within the software delivery lifecycle.
- Developed application features using JavaScript, React, Node.js and related technologies to address functional and business requirements.
- Supported backend development and API implementation, connecting application functionality to supporting services and data sources.
- Participated in code reviews and software testing to identify implementation issues, improve code quality and support deployment readiness.

Software Developer
Teach2Give | Nyeri, Kenya | Jan 2024 – Mar 2024
Key Responsibilities:

- Developed web application features using HTML, CSS, JavaScript, React and Node.js through practical software development projects.
- Created responsive frontend interfaces using React and JavaScript to deliver functional web application experiences.
- Implemented backend functionality using Node.js and Express to support application logic and service requirements.

PROJECTS

- **Employee Transport Booking System:** Built an enterprise booking platform that streamlined scheduling, prevented conflicting bookings and improved route visibility.
- **AI Knowledge Assistant:** Developed an AI knowledge assistant that enabled faster access to organisational documentation through RAG and OpenAI.
- **Time Entry Management System:** Built a centralised time-entry system that replaced spreadsheet tracking with structured approvals and reporting.
- **Data Synchronisation Platform:** Engineered an automated data synchronisation platform that improved data consistency and eliminated manual reconciliation.
- **Leafpower Solar Solutions:** Developed and deployed a full-stack website that established the company's digital presence and supported customer engagement.

CERTIFICATIONS & TRAINING

- **Foundational C# with Microsoft** | freeCodeCamp
- **Software Development Training Programme** | Teach2Give

TOOLS

C#, .NET, ASP.NET, Node.js, Express, React, Next.js, Angular, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, REST, PostgreSQL, MongoDB, SQL Server, OpenAI, Azure AI Foundry, Retrieval-Augmented Generation (RAG), Azure.
